

2468 - SPALT

Product Description:

2468 Spalt represents wood, which has been split traditionally with an ax along the wood grain. Unlike real splitted wood, which is only available in small pieces, Spalt can be used as full sized panels.

Composition:

2468 Spalt is an embossed panel with special developed veneer with a plywood core.

Fields of application:

Only for interior: Interior fittings. Furniture manufacture. Shop and fair construction. Doors.

Technical Data:

First given measurement specifies the direction of embossment:

Invoiced size (mm): 2450 x 635 / 635 x 2450
2450 x 1050
Delivered size (mm): 2450 x 635 / 635 x 2450
2450 x 1050

Repeating pattern: No repeating pattern

Available thicknesses: 21 mm
Coreboard: Plywood
Surface: raw, unlacquered

Density: ca. 900 kg/m³
Weight: ca. 19 kg/m²

Embossment: one-side
Deepness of structure: max. 7,0 mm

Tolerances:

Straightness: 3,0 mm per Meter
Size accuracy: +/- 1,0 mm per Meter
Thickness allowance: +/- 0,5 mm
Exactitude of profile: +/- 1,5 mm
